

Referral Policy

Your pet has been referred to the West Suburban Animal Clinic because your veterinarian has confidence in our training and ability to care for your pet's orthopedic needs. We will handle your pet's condition and then refer you back to your regular veterinarian for continued health care.

In the spirit of referrals please understand and respect the position we have taken toward referral cases in that we will only address the condition for which the patient was referred. Any request for additional services outside of the referred condition must be politely declined.

From a professional standpoint, we appreciate your understanding of this policy and thank you for the trust you and your veterinarian have placed in our services.
